DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 49, 51-58, 60-63, and 65-83, drawn to recombinant attenuated RSV virus with a modification to the MS-2 open reading frame, classified in class 435, subclass 236.
 - II. Claims 49, 51-58, 60-63, and 65-83, drawn to recombinant attenuated RSV virus with a modification to the SH gene, classified in class 435, subclass 236.
 - III. Claims 49, 51-58, 60-63, and 65-83, drawn to recombinant attenuated RSV virus with a modification to the NS1 gene, classified in class 435, subclass 236.
 - IV. Claims 49, 51-58, 60-63, and 65-83, drawn to recombinant attenuated RSV virus with a modification to the NS2 gene, classified in class 435, subclass 236.

The inventions are distinct, each from the other because of the following reasons:

2. The inventions of Groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). In the instant case, each of the claimed inventions has separate utility as an immunogenic virus particle or as a ligand for the detection of anti-HCV antibodies.

Conclusion

3. Because these inventions are distinct for the reasons given above and the search required for any one of the above Groups requires a search that is not required for the others, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. It is here noted that some of the restrictions requirements made above fall within the scope of PTO Linking claim practice. In accordance with this practice as described in MPEP 809.03, linking claims will be considered with the elected invention. If the elected invention is found allowable, the linking claim will also be examined. If no substantive rejection is found for the linking claim, the restriction among the Groups it comprises will be withdrawn.

Claims 49,51-53,55-58 and 60-71, and 73-83 are considered to be linking claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zachariah Lucas whose telephone number is 571-272-0905. The examiner can normally be reached on Monday-Friday, 8 am to 4:30 pm.
